

WELCOOME

THE  
**ZEMBA**  
COMPANIES

welcome

Started in 1987 with a push mower and a "no one will outwork us attitude," The Zemba Family began what is known today as one of Southeastern Ohio's largest service companies. In the beginning, a resilient work ethic, unmatched customer service, and endless days of hard work were the standard. Those days were tough and long. Today, The Zemba Companies continue to offer the industry's best service on all of our customers.

# Safety

At The Zemba Companies our #1 goal is to conduct our daily work as safely as possible. We accomplish this goal thru the dedication and commitment of all employees to always be as safe as possible. We are committed to training and developing of all employees through completion of OSHA 30 training, First Aid and CPR, confined space training, etc. We focus on being proactive, not reactive. All employees have Stop Work Authority and are encouraged to use it.

**Safety is the responsibility of all of us.**

**We do not just do the job, we do it as safely as possible.**

one accident is one too many

# Excavation

The Zemba Companies utilizes a large variety of earthwork equipment, ranging from small finish grade dozers, full size bulldozers, skid steer loaders, scrapers, sheep foot rollers, and articulated trucks to complete a wide arrange of earthwork projects. These projects include: excavation, embankment work, large commercial site development, and structural demolition and site reclamation.

## equipment

- Finish grade dozers
- Bulldozers
- Skid steer loaders
- Scrapers
- Sheep foot rollers
- Articulated trucks
- Backhoes
- Mini excavators
- Dump trucks
- Skid-steers
- Loaders
- Track hoes

## services

- Site development
- Demolition
- Excavation
- Embankment
- Reclamation
- Basements
- Foundation
- Grading
- Access roads
- Structure pads
- SWWPP
- Install and repair fire protection water systems

capability +  
equipment + experience  
get it done right - the first time!

we've got the right tool-

to get any job done right

# Directional Drilling

The Zemba Companies own and operate directional drill machines. These machines allow us to install various sizes of pipe by way of the trenchless option. These machines can install pipe ranging from ½" to 30" in diameter. This specialized method of pipe installation can create a cleaner, less disruptive option in a wide range of situations.

# Site Utility

The Zemba Companies own various sizes of track mounted excavators, rubber tire backhoes, and the necessary support equipment (i.e. skid steer loaders, wheel loaders, hydraulic hammers, hydraulic tamps, trench boxes, etc.) to install all sizes of storm sewer, sanitary sewer, and waterline piping, including headwalls, catch basins and manhole structures. We have completed full site development utility installations, cross country sanitary, and waterline system installations.

# RIES

Residential Industrial Environmental Services

## Vacuum Trucks

The Zemba Companies are equipped with numerous vacuum trucks ranging from 1,100 to 4,000 gallon straight trucks and 6,000 gallon tractor/trailer units to transport numerous types of liquid waste, either on-site or from your facility to the landfill. Our team can assist you with acquiring the profile numbers or manifest for the material/liquid being removed. We also have the capability to perform confined space entry, which has proven to be an integral piece of the services we provide. As a part of our service work, we are Health Department certified to complete system inspections and reports for their Department documentation, and our trucks are inspected and certified yearly by each Health Department for operation.

## camera inspections

We also have mobile push and robotic camera units that can inspect the interior conditions of pipe usually after jetting. These cameras will reveal possible reasons for pipe replacement or an explanation for reoccurring blockages. The inspection can be recorded for record retainage and verification. This system will easily inspect and record pipes ranging from 3" up to and including 48". This system also has the capability of locating a blockage or pipe directions change from above ground, which in turn can be identified by markings for potential excavation in the event the system is repaired or replaced. We also have the ability to perform 611 inspections and have personnel with PACP LACP and MACP certification

## air-excitation

The Zemba Companies also have air-excitation units that use air instead of water to excavate for when it is required or preferred by the customer. Excavated spoils can be dumped onsite and reused as dry backfill if preferred.

The Zemba Companies operates a line of hydro-excitation units, which are truck mounted, portable, self-contained vacuum systems. Each truck consists of a large vacuum pump with a hydraulic boom and an 8" suction hose that enables the truck to work from the sides of a roadway, wall, pit, tank, etc. cleaning catch basins, culverts, bins, etc. This unique vehicle is also equipped with a high pressure water jetting system which has many uses. While utilizing the vacuum it is used to loosen the material to be removed

as needed with no residual damage to the structure being cleaned. This system has proven itself time and time again when locating existing buried utilities ahead of our trenching crews during pipeline installation projects. The water jetting cuts into the soils and in turn; the loosened soils are vacuumed out exposing any buried utilities or structures. This hydro-excitation system alleviates the possible damage that could occur when using backhoes or shovels to perform the same tasks.

our promise  
precision + power + reliability

## Hydro-Excavation

# Septic Service

Service  
Repair  
Installation  
Maintenance  
Pumping

We service everything related to septic systems. As a part of our septic service work, we are Health Department Certified to complete system inspections and reports for their department documentation and our trucks are inspected and certified yearly by the local Health Departments for operation.

## confined space entry

We have the capability to perform confined space entry, which has proven to be an integral piece of the septic services we provide. We have a team of employees that are confined space trained for when the need arises. Our team has the knowledge, skills, abilities, and equipment to safely enter and complete work in confined space.

# Spill Response

Spill Response. Environmental remediation and emergency clean up. When accidents happen, we have the equipment, personnel, and expertise to safely contain, clean and remediate the area. Our response team is available to respond to emergencies 24/7.

# Water Hauling

The Zemba Companies own and operate a fleet of trucks, ranging from 1,500 gallon trucks to 4,000 gallon tankers to furnish and deliver potable water to our customers throughout the surrounding area. Delivery can be made by gravity into holding tanks or cisterns, or can be pumped into raised tanks and above ground pools, if needed. All trucks have been inspected and certified by the Health Department for service.

# Portable Restrooms

The Zemba Companies owns and services over 1,000 portable restrooms, which include 50 handicap accessible units, as well as portable wash stations, shower trailers, restroom trailers and more. As support to this service, we have multiple pumper service trucks to clean and service each unit at every location at regular scheduled intervals. We provide these for *emergencies, fairs, festivals, special events, one day events, long-term rentals, wedding receptions, graduation parties, building construction projects and residences* as requested.

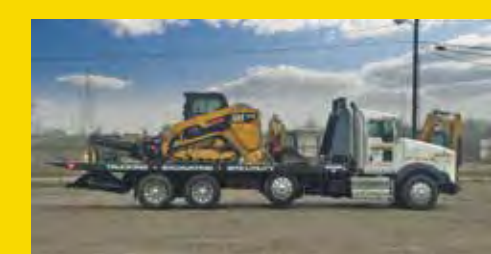

Zemba Logistics owns and operates a fleet of trucks to complete a wide range of work for our customers. We promise to deliver your product safely and on time. We take great pride in the condition of our equipment to ensure your product arrives safely at its desired location. Our drivers and staff are committed to providing you with top-notch professionalism and the service you deserve.

We own and operate multiple tractor/lowboy units as well as flatbed, detachable, roll-back an step deck trailers to haul equipment and oversize / permitable loads for our clients. The diversity in our equipment allows us the options to haul anything from excavators to jersey barriers and heavy machines and equipment.

# CLEVER

## Over 100 Years and Still Pouring

**More than a motto...** it is a culture of delivering a level of performance and quality of products that are superior to our competition.

Our "better" is the best because that is what you deserve.

### We strive to be your trusted partner in

- Ready mix concrete design, production and delivery
- Concrete tools, equipment and supplies
- Landscaping and contractor material

We're passionate about concrete and are constantly striving to design better mixes and delivery systems so that we can leave a lasting legacy together.

## Concrete, Our Specialty

We offer a wide range of concrete mixes to fit your specifications and needs. 1,500 PSI - 10,000 PSI Concrete, Grout Mixes & Flowable Fill. Our fleet of equipment to deliver your concrete include Front Discharge, Rear Discharge and Mini Mix Trucks. Whether your project is large or small, public or private, we can achieve almost any requirement your job may have. Our knowledgeable staff will gladly answer any questions you may have concerning your concrete project. If you would like a rough estimate, please use our online calculator.

### Fiber Mesh Concrete

Fibermesh is a concrete additive product that is mixed in with the cement at the ready mix plant. If you could look at a cross section of Fibermesh fibrous concrete, you would see millions of polypropylene. Fibermesh fibers uniformly distributed in all directions throughout the concrete mix. These fibers provide top-to-bottom, side-to-side uniform reinforcement and are a cost-effective and superior alternative to rebar or wire mesh reinforcement. We at Adams Bros. Concrete feel this is absolutely one of the best forms of reinforcement available today.

## Built to Stand the Test of Time

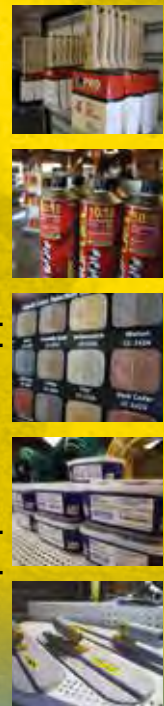

Adams Bros. Concrete Products has been supplying quality ready-mix material to the Zanesville and surrounding areas since 1908. We pride ourselves in keeping the time honored tradition of delivering "Always Better Concrete", quality ODOT approved material, and outstanding service. This is, and always has been a promise to all of our customers. Our business principles are as simple now as they were when our founders started pouring concrete; look your customer in the eye, give a firm hand shake, and then settle for nothing less than delivering more than what you promised... every time with no exceptions. Is this old school? Damn right it is, and we are proud of it because it works!

## Focused on the Future

Adams Bros. Concrete strives to improve service, delivery time, and our customers experience. Our operators are continually furthering their education and certifications to insure that you are getting world-class expertise. Not only do we have the best staff in the industry, they are equipped with a diverse fleet of modern mixers that can adapt to any job site.

Always clean, friendly and well stocked, our Marathon station is a great place to fuel up and fill up. We offer Charlie Biggs Chicken and a full assortment of refreshments, food and snacks.

## community involvement

### giving back

Giving back is an important element of the corporate philosophy at Zemba Companies. We dedicate many resources and our employees donate a tremendous amount of hours to help support many community organizations. We are proud of our efforts in the support of Festival Of Trees, Bet On Bailey, Carr Center Cake Auction, Big Brothers Big Sister, Bowl for Kids Sake, and local fairs and 4H groups.

### family field day

Zemba Companies Family Field Day is the event that is closest to our hearts. This event was born from the idea that children of all ages should have the opportunity to play in the dirt. In the early days, we created the event around 4 pieces of small excavating equipment that each child had the opportunity to run with the assistance of our employees, a small petting zoo and a straw maze. Over the years, the event has grown to approximately 8 pieces of equipment, a straw maze, pony rides, face painting, and tractor pulls, etc. This project is made possible by the hard work of our employees who donate their time, our corporate sponsors that provide the much needed money to fund such a project and the eager children that wait tirelessly in the lines to operate their favorite construction machine. All the proceeds are donated to local organizations and charities.

Our Mission is to uphold the high expectations, values, integrity & dedication we are known for. We achieve this by having the right culture, the right people, the right tools, and the relentless drive to be the solution. **We simply "Just do".**

# our mission

Since 1987, The Zemba Companies have been  
committed to our community, customers, employees,  
and most importantly - a job well done.

Contact us today to get your next project  
"On the Move"!
